

## **PANEVEZIO STATYBOS TRESTAS AB ENVIRONMENTAL POLICY**

Panevezio statybos trestas AB assumes responsibility for the environmental impact of its activities and by continually improving the environmental situation in the company seeks to ensure that it is kept to a minimum.

To achieve these targets, we always assess and identify opportunities and risks to fulfil all our obligations: reduce pollution of soil and groundwater with fuel, lubricants and hydraulic oils, limit emissions from vehicles, implement the latest technological solutions that make working even safer and more efficient, reduce the amount of construction waste and ensure its sorting. We also protect the natural environment from negative impacts and educate employees of the company by increasing their awareness and competencies in the environmental field.

These solutions help us to comply even more closely with environmental requirements and ensure minimal impact on the environment, both in minor construction activities and in implementation of complex and innovative construction projects.

*To implement the provisions of this policy, the top managers of the company each year review and update the targets and objectives, allocate the necessary resources and undertake to periodically review and, if necessary, adjust this EMS policy to make it relevant and appropriate.*

*This policy is published and available to all interested parties at [www.pst.lt](http://www.pst.lt)*

Egidijus Urbonas  
Managing Director
